MINI TOWED SALT SPREADER

PURPOSE

The MINI towed salt spreader is intended for spreading with salt of smaller traffic or pedestrian zones such as side walks, paths in the park, on graveyard and similar.

TECHNICAL DESCRIPTION

The MINI towed salt spreader is intended for towing with smaller vehicles or smaller tractors. It contains from container with capacity ~0.6 m³ and width 1000 mm, driving wheels with mechanism for turning on/off, system that regulates quantity of spreading material, roller with pushing plates for dosage of spreading material, signaling installation and towing hook Ø50 mm.

Turning on the spreader is made with mechanism for turning on which is placed on driving wheels.

Change of spreading material quantity is made via change of spring pressure on mechanical bottom of spreader.

ADDITIONAL EQUIPMENT

As additional equipment at customers request it is possible to deliver:

- protection cross bars on container (prevents falling in larger pieces of spreading material in container);
- tarpaulin cover (ensure that spreading material stays dry).

Type	Container capacity (m ³)	Spreading width (mm)	Weight (kg)
MINI 1000	0,6	1000	170

MOUNTING

The MINI towed salt spreader is intended for towing with smaller vehicles or smaller tractors. In standard version it is delivered with towed hook Ø50 mm, but on customers request it can be delivered with turning towing hook.
